ABHES BULLETIN

August 31, 2011

To: Accredited Institutions and Programs
From: Carol A. Moneymaker, Executive Director
Re: Wanted: Student and Graduate Success Stories

ABHES has been pleased to receive so many graduate success stories in recent years which, I understand, make an incredible impact on many. It is so motivating to read these stories and to acknowledge the continuing accomplishments of ABHES-accredited institutions and programs in educating students to become an integral part of the healthcare system.

ABHES invites its accredited institutions and programs to submit not only graduate, but current student, success stories. As we applaud our graduates' successes, we realize it is no small challenge for many to be successful in postsecondary education, and we recognize their dedication and drive. ABHES is most interested in posting to its website, or including in its next newsletter, personal accounts of those who are successfully enrolled in an ABHES-accredited institution or program and making a difference; or, who have graduated to achieve professional success in their chosen fields. We have so many successes!

We are increasingly hard pressed during these economic times to find individuals who have beaten the odds and realized their dreams. The stories will highlight the role that private postsecondary education plays in local communities by illustrating the type of students and highly qualified graduates ABHES-accredited institutions and programs are consistently able to attract and produce.

Please adhere to the following guidelines for submission:

1. Stories totaling 800 words or less must be sent by email to info@abhes.org in a Word-compatible file and named by ABHES ID number, school name, city, and state.
2. A digital photo may be included as a separate file, labeled accordingly to match the story.
3. The deadline date for submission is **October 15, 2011.**

To allow a diverse contribution, we request that a single campus not submit more than one article and corporate organizations operating a number of campuses submit no more than two articles regarding students or graduates from like-named, but geographically unlike, institutions.

About ABHES:

The Accrediting Bureau of Health Education Schools (ABHES) is recognized by the United States Secretary of Education for the accreditation of private, postsecondary institutions in the United States offering predominantly allied health education programs and the programmatic accreditation of medical assistant, medical laboratory technician and surgical technology programs leading to a certificate, diploma, Associate of Applied Science, Associate of Occupational Science, academic associate degrees, Baccalaureate Degree, and programs offered by distance delivery.
